PROFESSIONAL SUMMARY

As a software engineer, I architect, develop, and maintain web-based software solutions in collaboration with cross-functional teams. Proficient in problem-solving, specialize in backend development, ensuring quality through reviews and documentation.

EDUCATIONAL BACKGROUND

Shri Ramdeobaba College of Engineering and Management Nagpur-B.tech
2021-2025

I am currently pursuing my B.tech in Information Technology and passionate about learning new technology.

Bharat Dnyan Mandiram Convent, Wardha-SSC and HSC

Completed my SSC with 89% and HSC with 93%

EXPERIENCE

Blockchain Rcoem,Nagpur-PR and marketing member

played a pivotal role in planning and executing dynamic campaigns that elevated the brand's presence within the blockchain sector. nurtured media relationships for strategic placements. Additionally, contributed to successful event strategies, fostered active community participation, and supported key fundraising initiatives.

LEARNINGS

- Effective Communication
- Adaptability and Industry Dynamics
- Collaborative Teamwork

PROJECTS

User Authentication and Data Management-Backend

Developed web app with user authentication, diligent data management, and efficient session handling converge to ensure security and authentication mechanisms, encryption, hashing and controlled access which maintains both privacy and usability.

Device Finder-Full Stack Web app

July 2023 - Present

Developed a device finder application encompassing a map interface for visualizing user and device locations. Robust user authentication and registration mechanisms will ensure data security, complemented by session management for seamless logins. The system will empower users to add new devices for tracking.

Random Joke Generator-Backend and API

Developed a web application that generates random jokes, supported by a MongoDB backend. Users can contribute their own jokes, fostering a dynamic repository of humor.

Shopping Cart-Front end

Developed a shopping cart using React, with a focus on core functionalities. This platform will enable users to effortlessly add products to their cart, adjust quantities, and review corresponding prices and efficiently remove selected items.
